No Appropriations during last 10 years

Legal Authority

Legislative Finance Division tracking code

Source of Revenue

Federal Receipts

Restrictions on Use

Use restricted to Mental Health appropriation bills

Description and History

This code was created upon discovery that the Governor's FY05 mental health bill contained federal receipts (1002) that could not be readily identified as mental health appropriations. Mental health funding is identified by a flag indicating a code is categorized in the mental health group. Because the flag applies to all appropriations of a given fund source, this tracking code is required to identify the portion of federal receipts that are mental health appropriations.

The issue applies to corporate dividends as well. LFD hopes to avoid creating tracking codes for fund sources not already flagged as mental health. This may mean substituting GF/MH for corporate dividends used in the Governor's proposed mental health bill.

November 2019

Federal Mental Health fund code 1187 has not been used and the fund code is deactivated. LFD can utilize filters in reporting from the Budget System to identify the amount of federal funding appropriated in the mental health bill.
