Description and History

Until FY03, Inspection fees for elevators, boilers and electrical and plumbing work were identified as general fund program receipts and were routinely appropriated to the department for administration of various mechanical inspection programs.

Chapter 96 SLA 2002 created the building safety account within the general fund and provided for various mechanical inspection fees to flow into the new account. Fees for inspection of "carnival rides" were added in 2004. Replacement of the generic program receipt code allowed collections in excess of annual appropriations to remain available for spending in future years.
