

**Pacific Coastal Salmon Recovery Fund****FY2025 Request: \$6,800,000****Reference No: AMD 64781****AP/AL:** Appropriation**Category:** Natural Resources**Location:** Statewide**Impact House District:** Statewide (HD 1 - 40)**Estimated Project Dates:** 07/01/2024 - 06/30/2029**Project Type:** Research / Studies / Planning**Recipient:** NA**House District:** Statewide (HD 1 - 40)**Contact:** Sam Rabung**Contact Phone:** (907)465-4210**Brief Summary and Statement of Need:**

This project allows the Department of Fish and Game (DFG) to continue receiving federal grant funds from the Pacific Coastal Salmon Recovery Fund. Projects are selected through a competitive process, with funding supporting stock assessment, harvest monitoring, eradicating invasive species such as northern pike, and habitat projects. The 33 percent match requirement is passed on to the project funding recipients. Projects support the sustainability of Alaska salmon, enhance the ability of the department to manage fisheries, and contribute to the economy and food security of the people of Alaska.

**Project Description/Justification:**

The Alaska Sustainable Salmon Fund (AKSSF) is Alaska's program for administering these federal funds. The State intends to apply the funds over a five-year period. The overall objective is promoting sustainability of Alaska's salmon populations and maintaining salmon populations that are utilized for subsistence. DFG operates the program according to congressional and federal

guidance.

The federal government provides grants and funding to State agencies and subrecipients through competitive calls for proposals for stock assessment, harvest monitoring, and habitat conservation and restoration projects.

Pacific Coastal Salmon Recovery Fund (PCSRF) projects contribute to the core services of stock assessment and research and management. Key approaches include estimating monitoring escapement of salmon populations. Collectively, PCSRF projects contribute to long-term sustainability of salmon populations and salmon habitats, thereby ensuring harvest opportunities are maintained.

Habitat restoration and protection projects funded through the AKSSF span all regions of the state. In the last 12 years, 26 fish passage restoration projects were funded, primarily in the Mat-Su Valley and Kenai Peninsula. One project alone restored access to 274 hectares of lake habitat and 42.6 kilometers of stream habitat for spawning and rearing salmon. Several other projects eradicated invasive northern pike from the Kenai Peninsula and funded extensive stream bank restoration around Fairbanks, the Mat-Su, and the Kenai Peninsula. Seventy projects in the same period focused on ensuring continued subsistence fishing opportunities. Harvest monitoring projects took place in Cold Bay, King Cove, Port Heiden, Unalaska, and Sand Point on the Alaska Peninsula, Port Graham and Nanwalek on the Kenai Peninsula, and King Salmon and Naknek in Bristol Bay.

Escapement projects on subsistence runs have ensured sustainable returns on the Chena, Salcha, and Anvik rivers, the Bonanza River near Nome, the Kuskokwim River, the Chignik River, and the Pasagshak and Afognak rivers on the Kodiak Archipelago. Other projects have assessed returns to Klawock and the Copper and Kvichak rivers. These and dozens of other projects have benefited Alaskans from all regions of the state.
