**Project Description/Justification:**

This program supports cooperation between federal, non-State agencies and the State, where the State has specialized knowledge or can combine work for a federal agency with work being done by the State to save costs.

In the past, this project has provided for special soils drilling analysis requested by the United States Forest Service in support of the forest highway program, road maintenance for federally owned roads, and paving a park road for the United States Park Service while the Department of Transportation and Public Facilities' (DOT&PF) contractor was paving a State-owned road. Funding has been utilized to construct projects for the Denali Commission, including Pile Bay Road rehabilitation and a rural dust control demonstration project.

The majority of this project is for utility-related or non-federal activities. Utility facilities such as sewer and water lines, telephone lines, and natural gas pipelines are placed within DOT&PF's right-of-way under a permit process. A utility company may request that upgrades to their facilities be incorporated into a State construction project to take advantage of the economies of scale, and to preclude the need to dig up the roadway soon after project completion. The cooperative reimbursable expenditure authority is required to allow DOT&PF to expend funds and bill entities for non-federal and non-State participating work.
