FUND NO LONGER ACTIVE

Description and History

Created by Sec. 2, Ch. 266, SLA 1976 and repealed by Sec. 11, Ch 116, SLA 1980.

The Marine Coastal Protection Fund was created after Congress passed the coastal management act for coastal states in 1972. In 1975, Alaska received its first federal grants for coastal management. The Department of Environmental Conservation housed the marine coastal grant program originally, but the Division of Policy Development and Planning in the Governor's Office soon became the lead agency for the federal grants.

Marine Coastal Protection grant funding required a 20% state match. From FY75 to approximately FY78 the state received between \$1 million and \$1.5 million annually. From FY78 forward, the state received approximately \$5 million. Most of the funding was distributed to other state agencies to help communities manage coastal development.
