Project Description/Justification:

The Department of Environmental Conservation provides technical and financial support to Alaska's communities to design and construct drinking water and sanitation facilities. Communities apply each year for grants for these projects. Applications are scored based primarily on the extent to

Village Safe Water and Wastewater Infrastructure Projects: FY2025 Request: \$106,100,000
Expansion, Upgrade, and Replacement of Existing Service Reference No: AMD 49749

which proposed projects address critical public health needs, as well as the communities' capacity to operate and maintain the facilities. High-priority projects are placed on a multi-year priority list, which identifies projects to receive funding over the next several years. The majority of project awards under this program are eligible for grant funds available to the State through the federal government. A portion of the federal grant monies available requires the State to appropriate matching funds.

Each year, communities propose more projects than there is available State funding. When projects are proposed, total costs are estimated based on the best information available but are subject to change. Balances in these projects may be shifted to other projects that were underestimated or applied to other approved projects on the waiting list based on a first-ready, first-served basis.
