This project proposes to rehabilitate the runway, taxiway, apron and access road, navigational aid access paths/pads, reconstruct the airfield lighting system and dust palliative. The runway safety area will be widened and lengthened to meet Airplane Design Group II standards. The lighting system has been compromised by subsidence, which has stretched the cables and dislodged fixtures. The lighting system is beyond its useful life (10 years). The operational surfaces need repair. There are significant surface variations, distortion, and differential settlement cracking throughout the runway. There are significant depressions and humps on the surface movement area, especially on the area of the runway extension.
